

Plain line (Control)

Object A = B · **Object B** = Bext · **Object C** = Benl

Which is more similar to A?

A

B

C

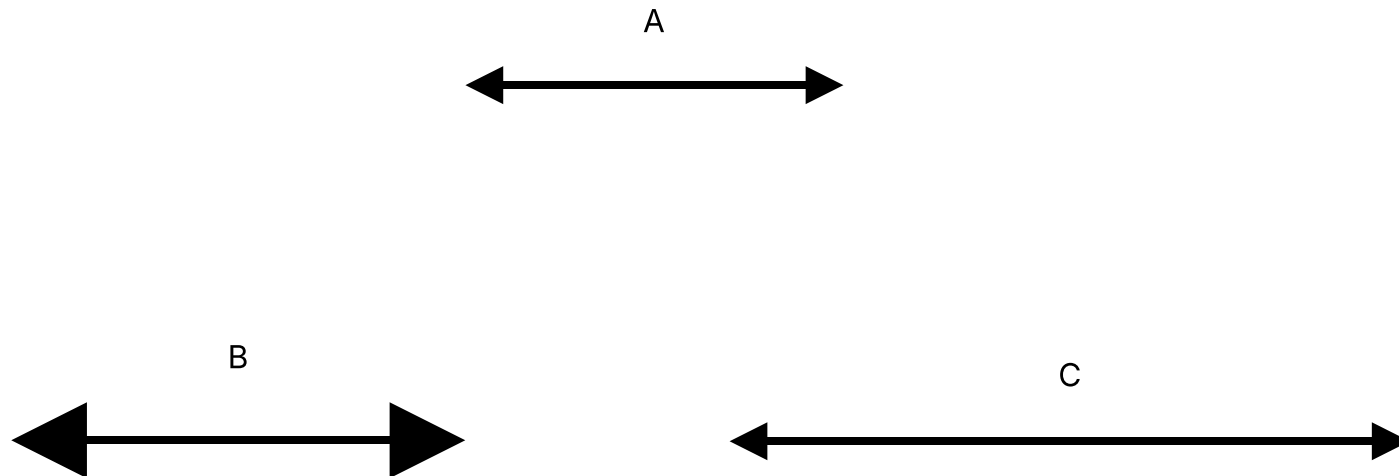

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), no edges. **Object B**: body 80×1 mm (length $\times$ thickness), no edges. **Object C**: body 80×2 mm (length $\times$ thickness), no edges.

Double-headed arrow (Bi-directional)

Object A = B E · **Object B** = B Eenl · **Object C** = Bext E

Which is more similar to A?

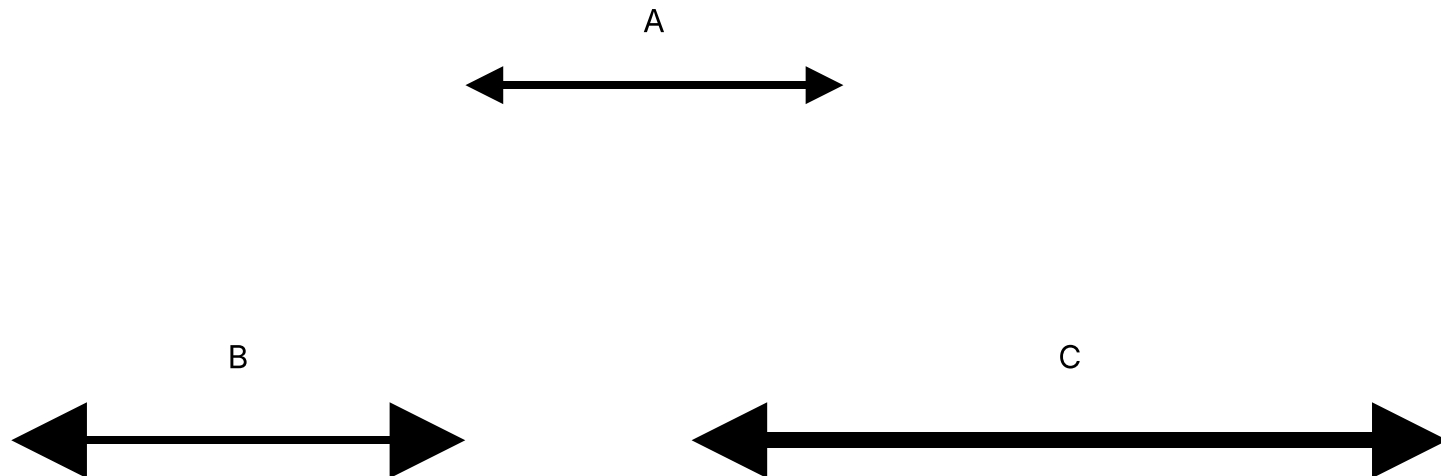

When printed at 100% on A4. **Object A**: body 40 × 1 mm (length × thickness), edges 5 × 5 mm. **Object B**: body 40 × 1 mm (length × thickness), edges 10 × 10 mm. **Object C**: body 80 × 1 mm (length × thickness), edges 5 × 5 mm.

Double-headed arrow (Bi-directional)

Object A = B E · **Object B** = B Eenl · **Object C** = Benl Eenl

Which is more similar to A?

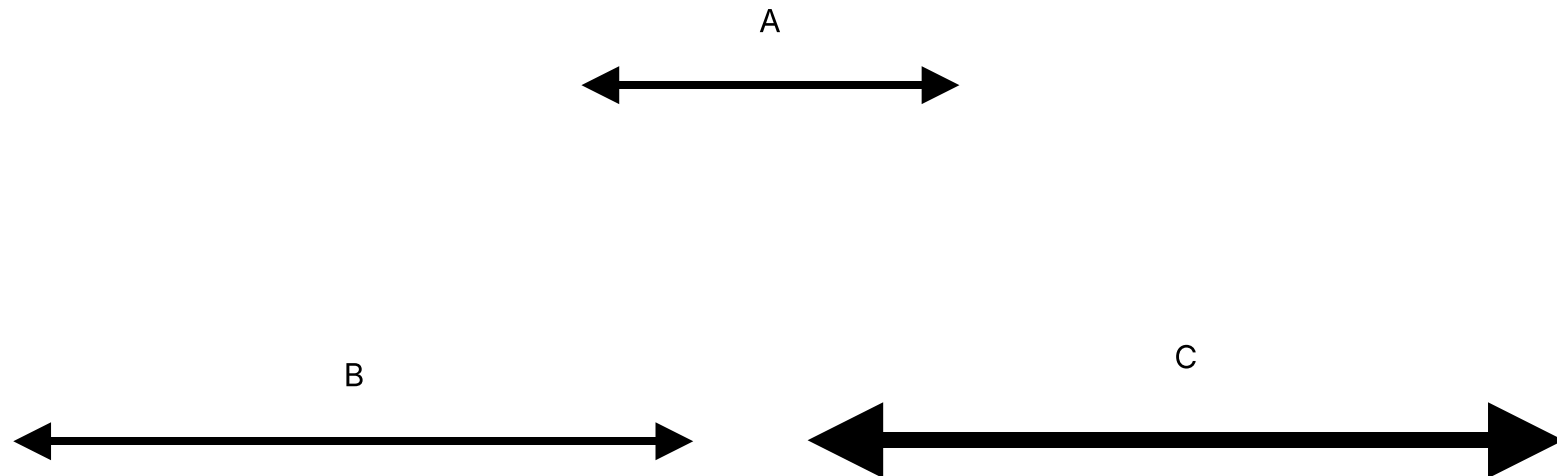

When printed at 100% on A4. **Object A**: body 40 × 1 mm (length × thickness), edges 5 × 5 mm. **Object B**: body 40 × 1 mm (length × thickness), edges 10 × 10 mm. **Object C**: body 80 × 2 mm (length × thickness), edges 10 × 10 mm.

Double-headed arrow (Bi-directional)

Object A = B E · **Object B** = Bext E · **Object C** = Benl Eenl

Which is more similar to A?

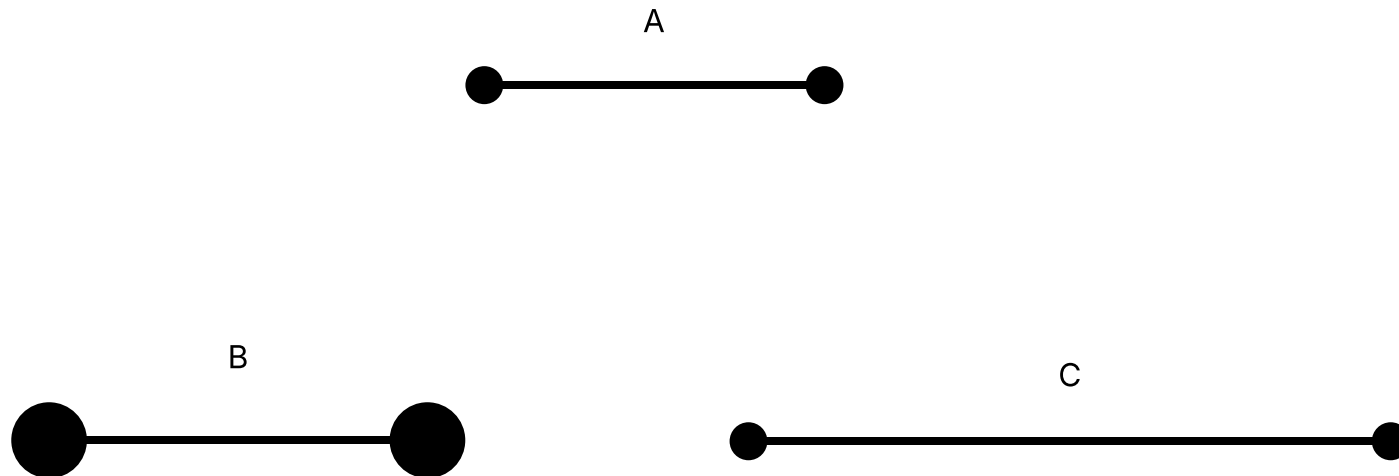

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 5×5 mm. **Object B**: body 80×1 mm (length $\times$ thickness), edges 5×5 mm.

Object C: body 80×2 mm (length $\times$ thickness), edges 10×10 mm.

Circles at both ends (Bi-directional)

Object A = B E · **Object B** = B Eenl · **Object C** = Bext E

Which is more similar to A?

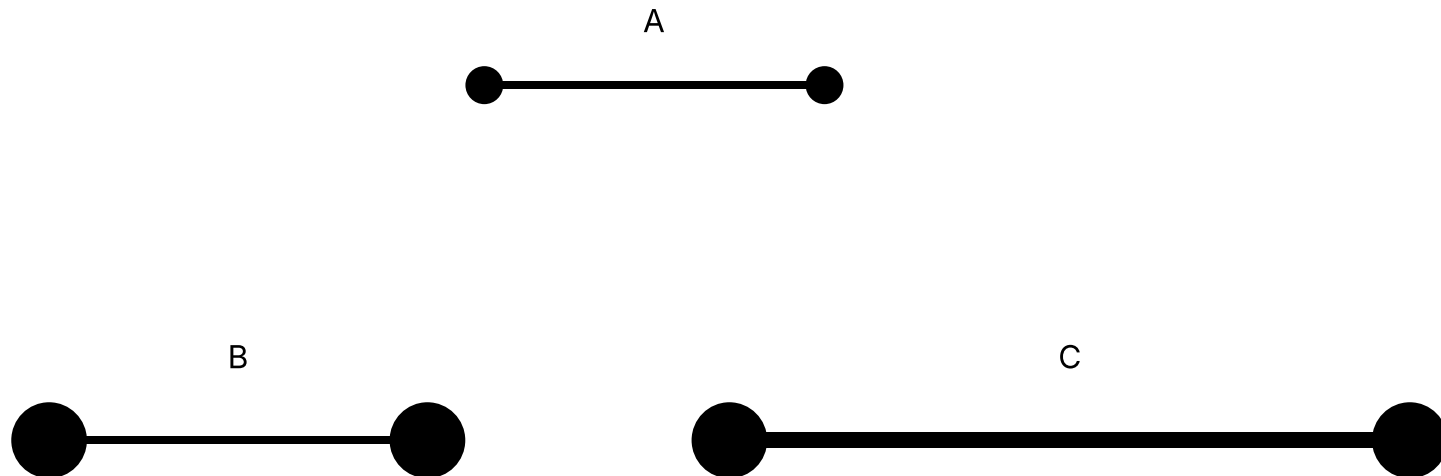

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 5×5 mm. **Object B**: body 40×1 mm (length $\times$ thickness), edges 10×10 mm. **Object C**: body 80×1 mm (length $\times$ thickness), edges 5×5 mm.

Circles at both ends (Bi-directional)

Object A = B E · **Object B** = B Eenl · **Object C** = Benl Eenl

Which is more similar to A?

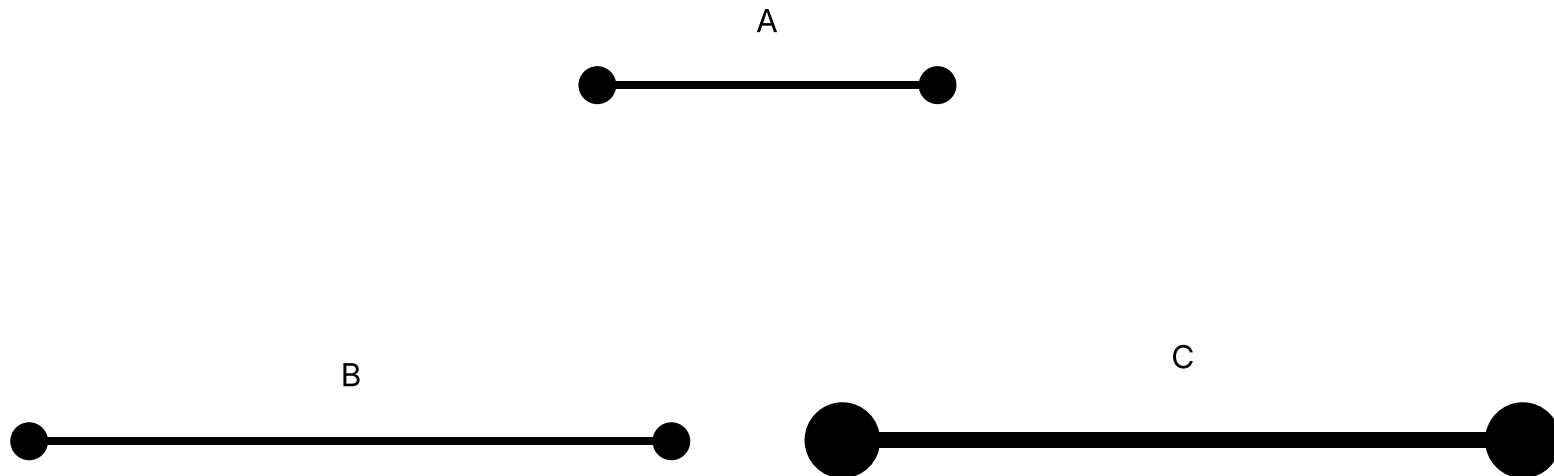

When printed at 100% on A4. **Object A**: body 40 × 1 mm (length × thickness), edges 5 × 5 mm. **Object B**: body 40 × 1 mm (length × thickness), edges 10 × 10 mm. **Object C**: body 80 × 2 mm (length × thickness), edges 10 × 10 mm.

Circles at both ends (Bi-directional)

Object A = B E · **Object B** = Bext E · **Object C** = Benl Eenl

Which is more similar to A?

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 5×5 mm. **Object B**: body 80×1 mm (length $\times$ thickness), edges 5×5 mm.

Object C: body 80×2 mm (length $\times$ thickness), edges 10×10 mm.

Colored end segments (Bi-directional)

Object A = B E · **Object B** = B Eext · **Object C** = Bext E

Which is more similar to A?

A

B

C

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 2×1 mm. **Object B**: body 40×1 mm (length $\times$ thickness), edges 4×1 mm.

Object C: body 80×1 mm (length $\times$ thickness), edges 2×1 mm.

Colored end segments (Bi-directional)

Object A = B E · **Object B** = B Eext · **Object C** = Benl Eenl

Which is more similar to A?

A

B

C

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 2×1 mm. **Object B**: body 40×1 mm (length $\times$ thickness), edges 4×1 mm.

Object C: body 80×2 mm (length $\times$ thickness), edges 4×2 mm.

Colored end segments (Bi-directional)

Object A = B E · **Object B** = Bext E · **Object C** = Benl Eenl

Which is more similar to A?

A

B

C

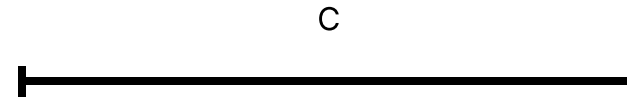

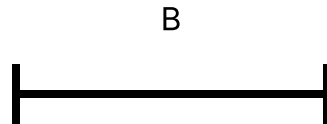

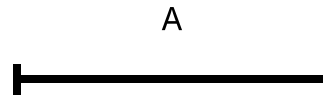

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 2×1 mm. **Object B**: body 80×1 mm (length $\times$ thickness), edges 2×1 mm.

Object C: body 80×2 mm (length $\times$ thickness), edges 4×2 mm.

Short vertical end lines (Bi-directional)

Object A = B E · **Object B** = B Eext · **Object C** = Bext E

Which is more similar to A?

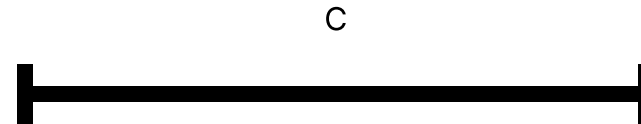

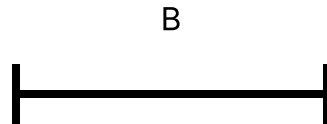

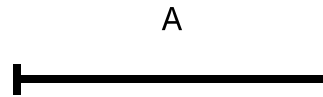

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 1×4 mm. **Object B**: body 40×1 mm (length $\times$ thickness), edges 1×8 mm.

Object C: body 80×1 mm (length $\times$ thickness), edges 1×4 mm.

Short vertical end lines (Bi-directional)

Object A = B E · **Object B** = B Eext · **Object C** = Benl Eenl

Which is more similar to A?

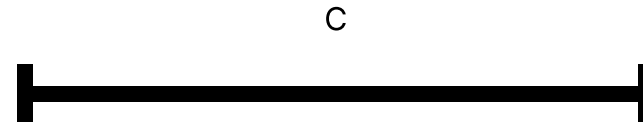

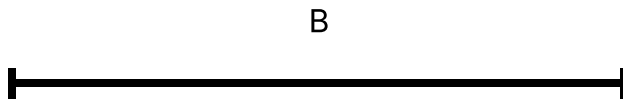

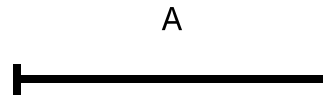

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 1×4 mm. **Object B**: body 40×1 mm (length $\times$ thickness), edges 1×8 mm.

Object C: body 80×2 mm (length $\times$ thickness), edges 2×8 mm.

Short vertical end lines (Bi-directional)

Object A = B E · **Object B** = Bext E · **Object C** = Benl Eenl

Which is more similar to A?

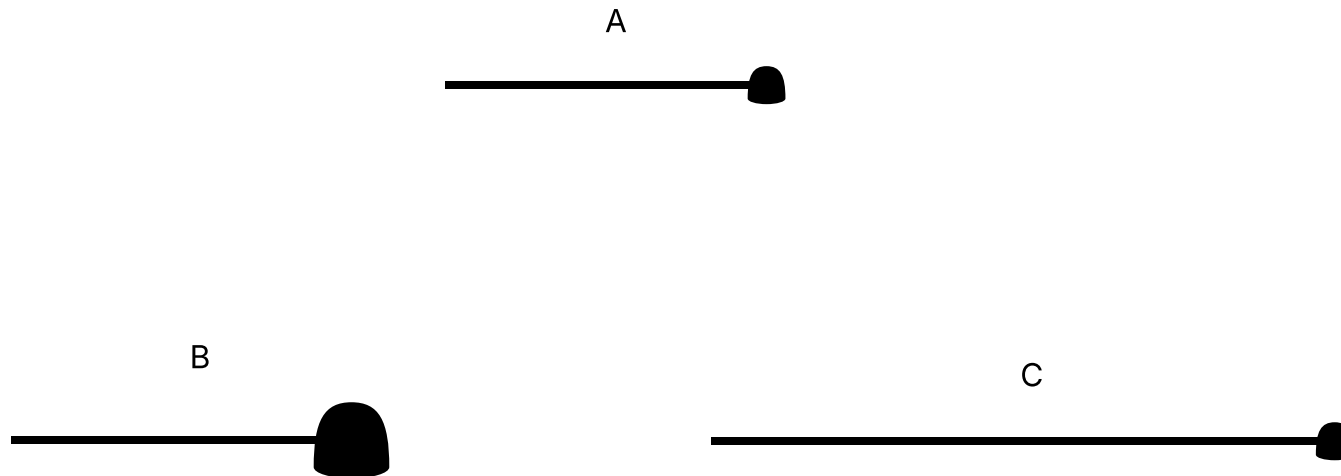

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 1×4 mm. **Object B**: body 80×1 mm (length $\times$ thickness), edges 1×4 mm.

Object C: body 80×2 mm (length $\times$ thickness), edges 2×8 mm.

One abstract right end (Uni-directional)

Object A = B E · **Object B** = B Eenl · **Object C** = Bext E

Which is more similar to A?

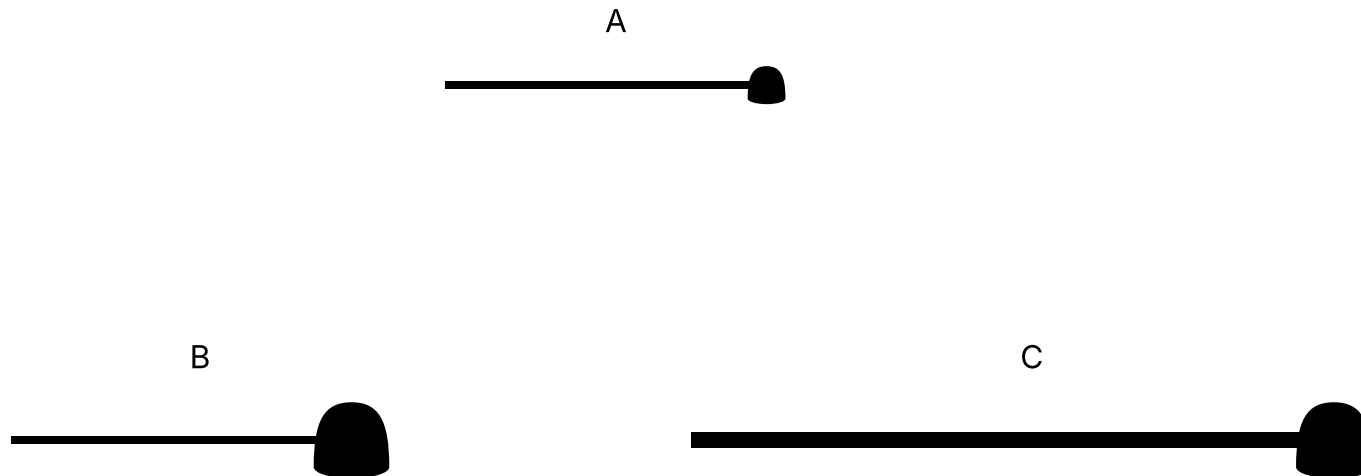

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 5×5 mm. **Object B**: body 40×1 mm (length $\times$ thickness), edges 10×10 mm. **Object C**: body 80×1 mm (length $\times$ thickness), edges 5×5 mm.

One abstract right end (Uni-directional)

Object A = B E · **Object B** = B Eenl · **Object C** = Benl Eenl

Which is more similar to A?

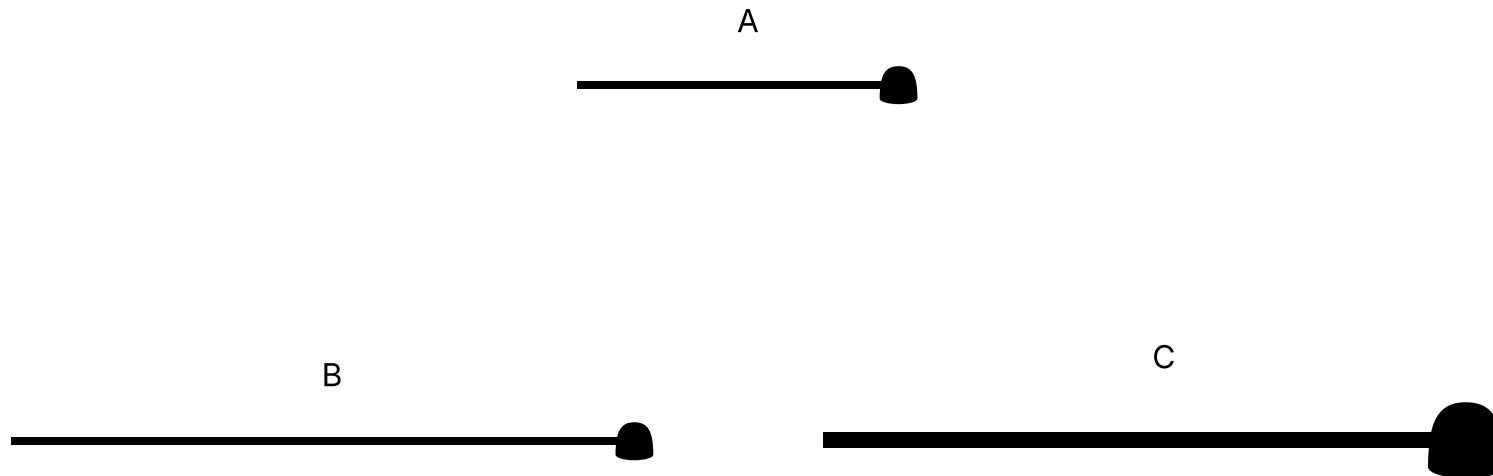

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 5×5 mm. **Object B**: body 40×1 mm (length $\times$ thickness), edges 10×10 mm. **Object C**: body 80×2 mm (length $\times$ thickness), edges 10×10 mm.

One abstract right end (Uni-directional)

Object A = B E · **Object B** = Bext E · **Object C** = Benl Eenl

Which is more similar to A?

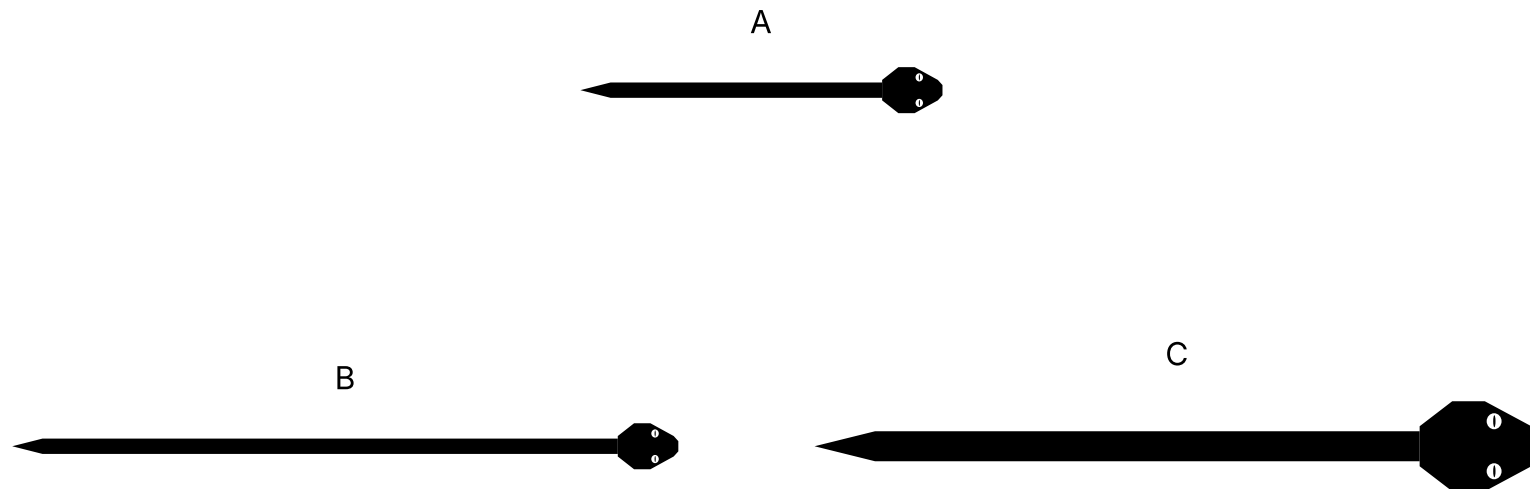

When printed at 100% on A4. **Object A**: body 40×1 mm (length $\times$ thickness), edges 5×5 mm. **Object B**: body 80×1 mm (length $\times$ thickness), edges 5×5 mm.

Object C: body 80×2 mm (length $\times$ thickness), edges 10×10 mm.

Snake (Uni-directional)

Object A = B E · **Object B** = Bext E · **Object C** = Benl Eenl

Which is more similar to A?

When printed at 100% on A4. **Object A**: body 40×2 mm (length $\times$ thickness), edges 8×6 mm. **Object B**: body 80×2 mm (length $\times$ thickness), edges 8×6 mm. **Object C**: body 80×4 mm (length $\times$ thickness), edges 16×12 mm.

Train (Uni-directional)

Object A = B E · **Object B** = Bext E · **Object C** = Benl Eenl

Which is more similar to A?

A

B

C

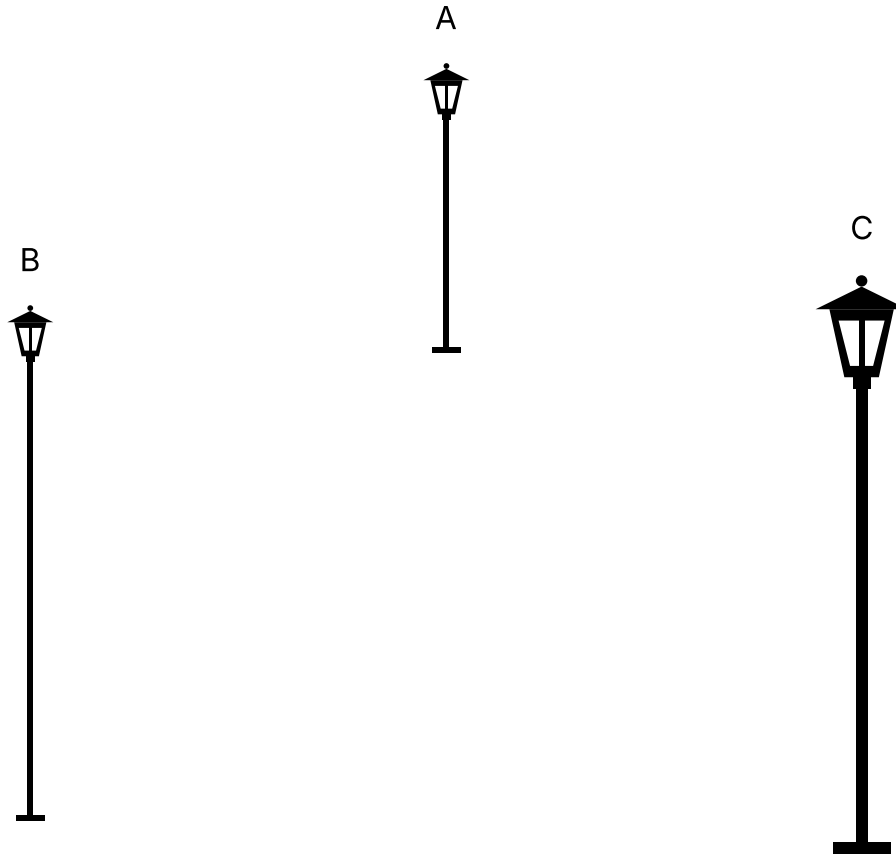

When printed at 100% on A4. **Object A**: body NaN × NaN mm (length × thickness), edges 42 × 4.2 mm. **Object B**: body NaN × NaN mm (length × thickness), edges 84 × 4.2 mm. **Object C**: body NaN × NaN mm (length × thickness), edges 84 × 8.4 mm.

Lamp (Uni-directional)

Object A = B E · **Object B** = Bext E · **Object C** = Benl Eenl

Which is more similar to A?

When printed at 100% on A4. **Object A**: body 30 × 0.75 mm (length × thickness), edges 6 × 7.5 mm. **Object B**: body 60 × 0.75 mm (length × thickness), edges 6 × 7.5 mm. **Object C**: body 60 × 1.5 mm (length × thickness), edges 12 × 15 mm.
