

Square of squares

Which is more similar to A?

A

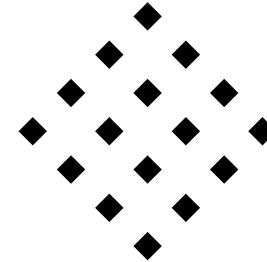

B

Sub-shapes rotated 45°

C

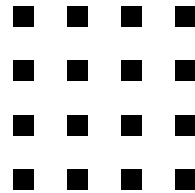

Whole rotated 45°

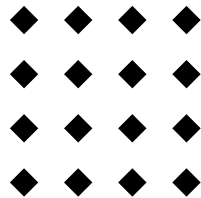

Square of squares

Which is more similar to A?

A

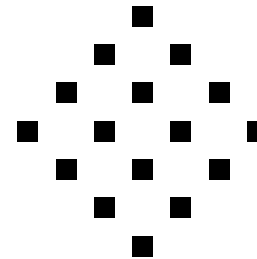

B

Sub-shapes rotated 45°

C

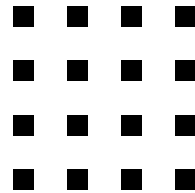

Global shape rotated 45°

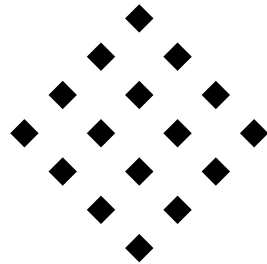

Square of squares

Which is more similar to A?

A

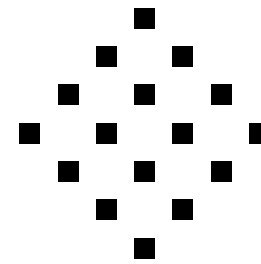

B

Whole rotated 45°

C

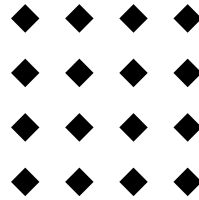

Global shape rotated 45°

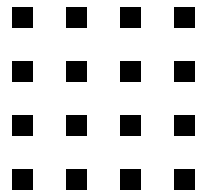

Square of diamonds

Which is more similar to A?

A

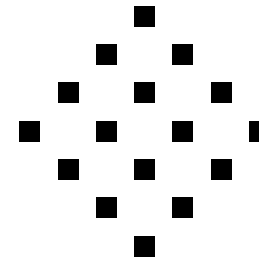

B

Sub-shapes rotated 45°

C

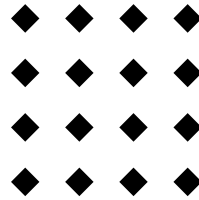

Whole rotated 45°

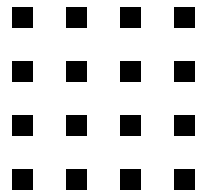

Square of diamonds

Which is more similar to A?

A

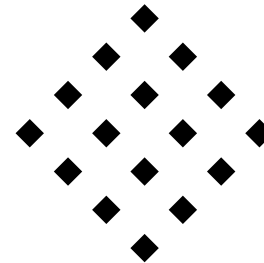

B

Sub-shapes rotated 45°

C

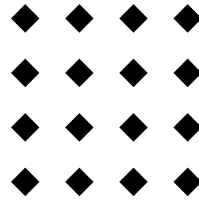

Global shape rotated 45°

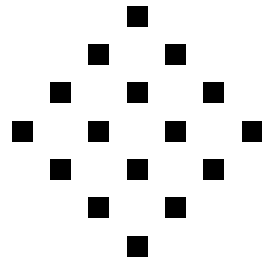

Square of diamonds

Which is more similar to A?

A

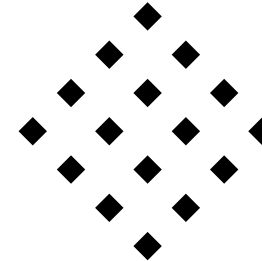

B

Whole rotated 45°

C

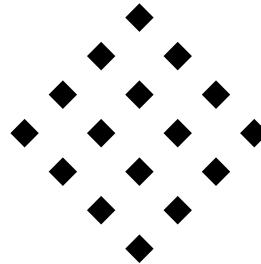

Global shape rotated 45°

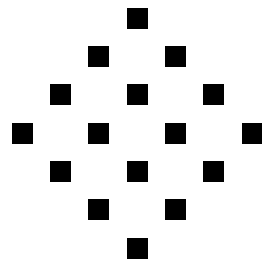

Diamond of diamonds

Which is more similar to A?

A

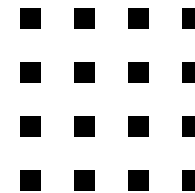

B

Sub-shapes rotated 45°

C

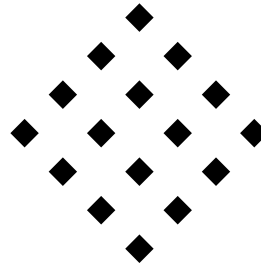

Whole rotated 45°

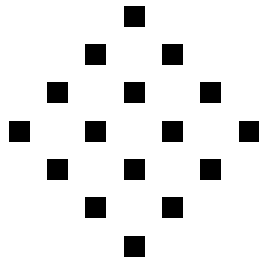

Diamond of diamonds

Which is more similar to A?

A

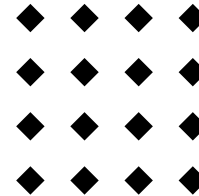

B

Sub-shapes rotated 45°

C

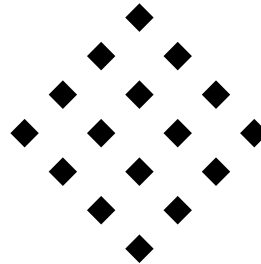

Global shape rotated 45°

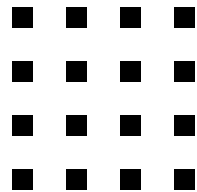

Diamond of diamonds

Which is more similar to A?

A

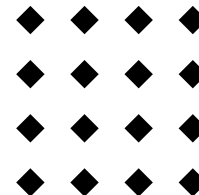

B

Whole rotated 45°

C

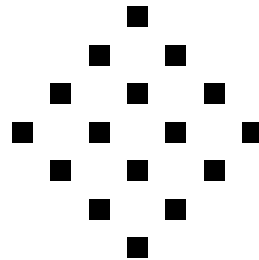

Global shape rotated 45°

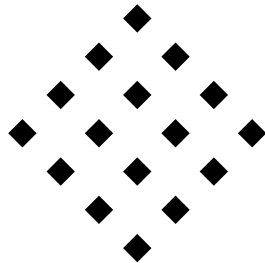

Diamond of squares

Which is more similar to A?

A

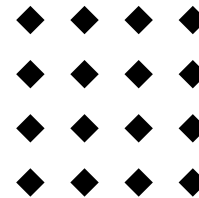

B

Sub-shapes rotated 45°

C

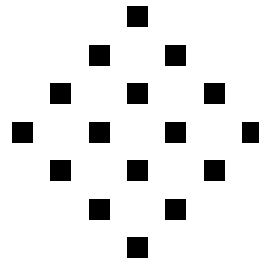

Whole rotated 45°

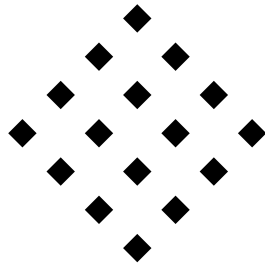

Diamond of squares

Which is more similar to A?

A

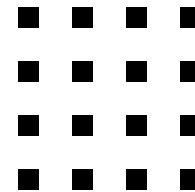

B

Sub-shapes rotated 45°

C

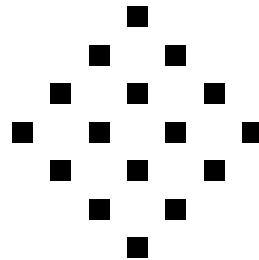

Global shape rotated 45°

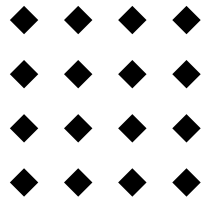

Diamond of squares

Which is more similar to A?

A

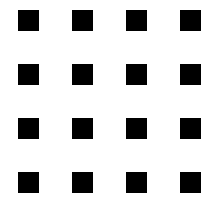

B

Whole rotated 45°

C

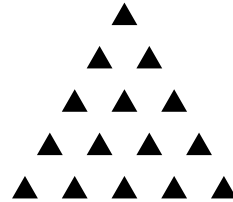

Global shape rotated 45°

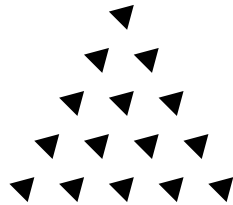

Upward pointing triangle of upward pointing triangles

Which is more similar to A?

A

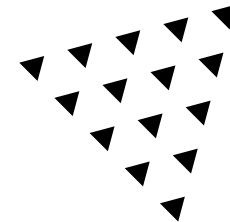

B

Sub-shapes rotated 45°

C

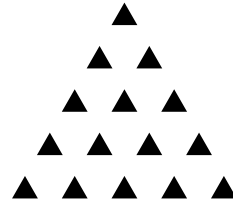

Whole rotated 45°

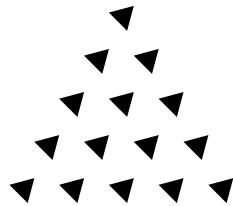

Upward pointing triangle of upward pointing triangles

Which is more similar to A?

A

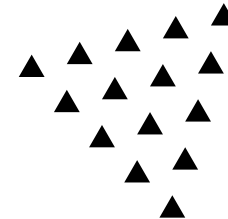

B

Sub-shapes rotated 45°

C

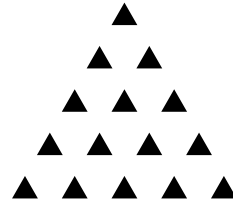

Global shape rotated 45°

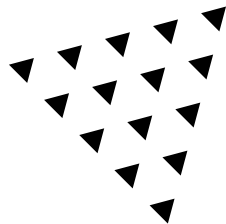

Upward pointing triangle of upward pointing triangles

Which is more similar to A?

A

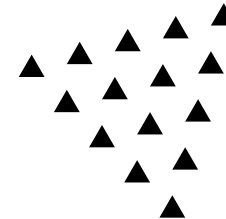

B

Whole rotated 45°

C

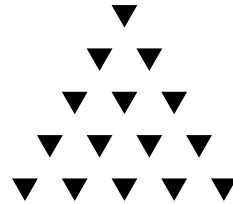

Global shape rotated 45°

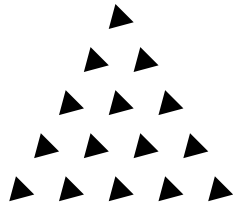

Upward pointing triangle of downward pointing triangles

Which is more similar to A?

A

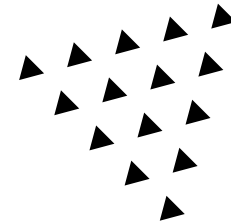

B

Sub-shapes rotated 45°

C

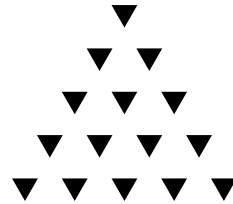

Whole rotated 45°

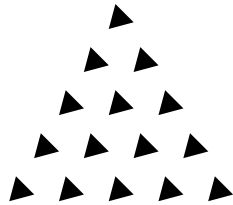

Upward pointing triangle of downward pointing triangles

Which is more similar to A?

A

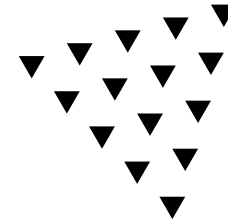

B

Sub-shapes rotated 45°

C

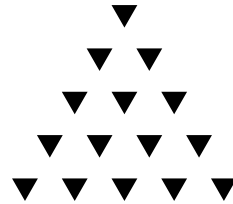

Global shape rotated 45°

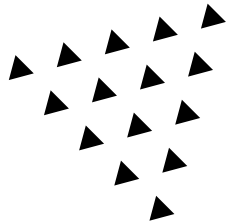

Upward pointing triangle of downward pointing triangles

Which is more similar to A?

A

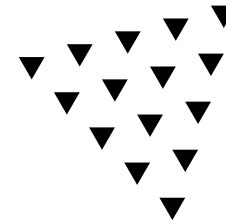

B

Whole rotated 45°

C

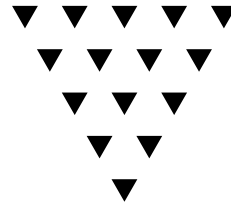

Global shape rotated 45°

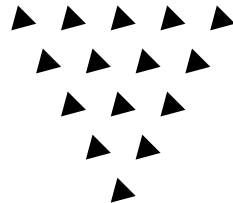

Downward pointing triangle of downward pointing triangles

Which is more similar to A?

A

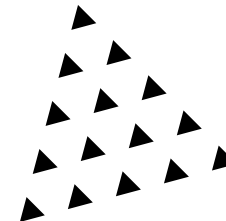

B

Sub-shapes rotated 45°

C

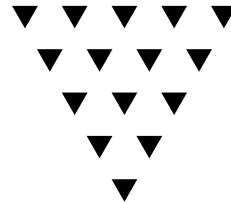

Whole rotated 45°

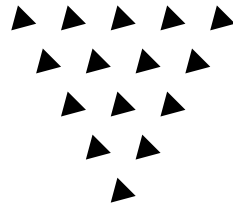

Downward pointing triangle of downward pointing triangles

Which is more similar to A?

A

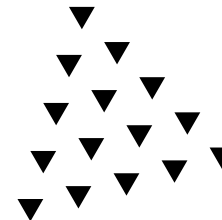

B

Sub-shapes rotated 45°

C

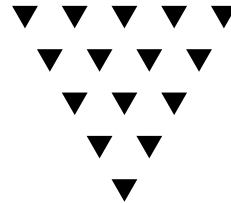

Global shape rotated 45°

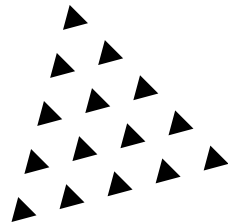

Downward pointing triangle of downward pointing triangles

Which is more similar to A?

A

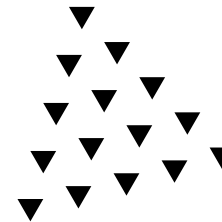

B

Whole rotated 45°

C

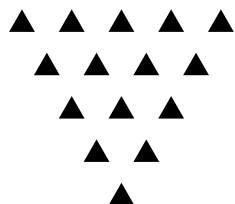

Global shape rotated 45°

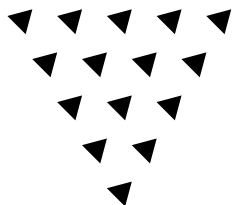

Downward pointing triangle of upward pointing triangles

Which is more similar to A?

A

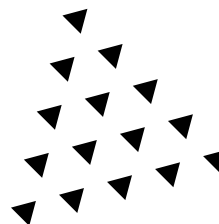

B

Sub-shapes rotated 45°

C

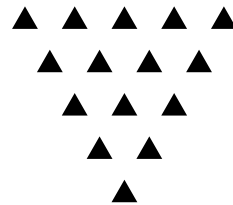

Whole rotated 45°

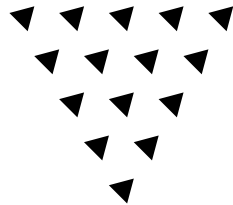

Downward pointing triangle of upward pointing triangles

Which is more similar to A?

A

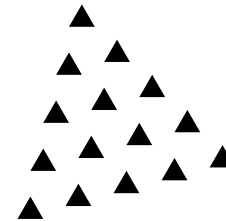

B

Sub-shapes rotated 45°

C

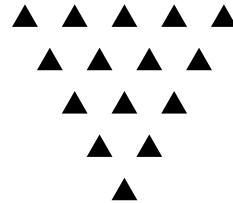

Global shape rotated 45°

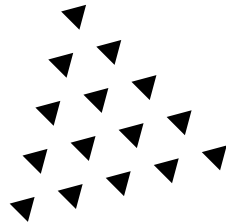

Downward pointing triangle of upward pointing triangles

Which is more similar to A?

A

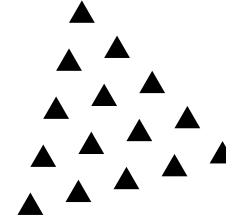

B

Whole rotated 45°

C

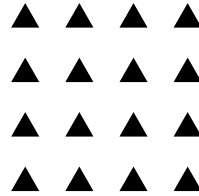

Global shape rotated 45°

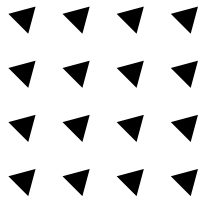

Square of upward pointing triangles

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Whole rotated 45°

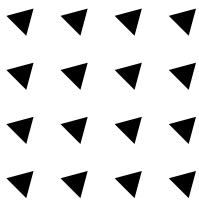

Square of upward pointing triangles

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Global shape rotated 45°

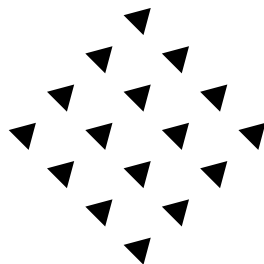

Square of upward pointing triangles

Which is more similar to A?

A

B

Whole rotated 45°

C

Global shape rotated 45°

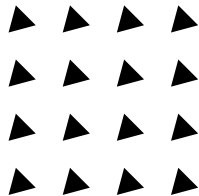

Square of downward pointing triangles

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Whole rotated 45°

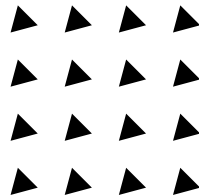

Square of downward pointing triangles

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Global shape rotated 45°

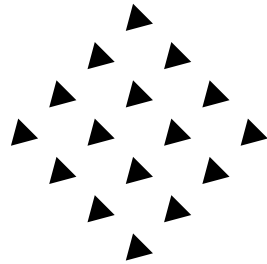

Square of downward pointing triangles

Which is more similar to A?

A

B

Whole rotated 45°

C

Global shape rotated 45°

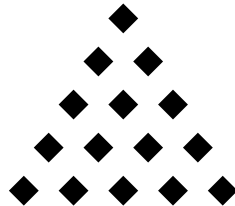

Upward pointing triangle of squares

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Whole rotated 45°

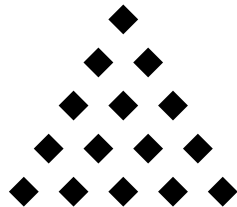

Upward pointing triangle of squares

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Global shape rotated 45°

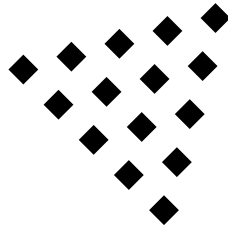

Upward pointing triangle of squares

Which is more similar to A?

A

B

Whole rotated 45°

C

Global shape rotated 45°

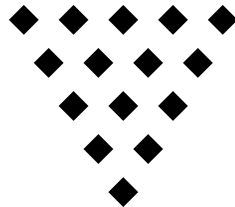

Downward pointing triangle of squares

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Whole rotated 45°

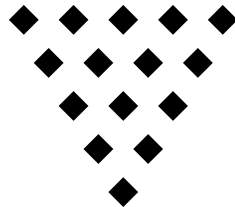

Downward pointing triangle of squares

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Global shape rotated 45°

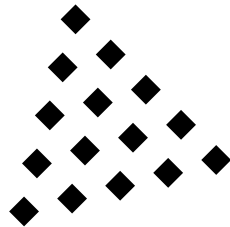

Downward pointing triangle of squares

Which is more similar to A?

A

B

Whole rotated 45°

C

Global shape rotated 45°

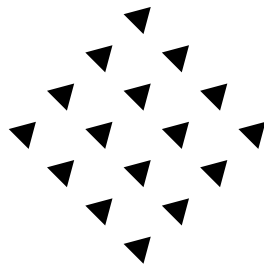

Diamond of upward pointing triangles

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Whole rotated 45°

Diamond of upward pointing triangles

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Global shape rotated 45°

Diamond of upward pointing triangles

Which is more similar to A?

A

B

Whole rotated 45°

C

Global shape rotated 45°

Diamond of downward pointing triangles

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Whole rotated 45°

Diamond of downward pointing triangles

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Global shape rotated 45°

Diamond of downward pointing triangles

Which is more similar to A?

A

B

Whole rotated 45°

C

Global shape rotated 45°

Upward pointing triangle of diamonds

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Whole rotated 45°

Upward pointing triangle of diamonds

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Global shape rotated 45°

Upward pointing triangle of diamonds

Which is more similar to A?

A

B

Whole rotated 45°

C

Global shape rotated 45°

Downward pointing triangle of diamonds

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Whole rotated 45°

Downward pointing triangle of diamonds

Which is more similar to A?

A

B

Sub-shapes rotated 45°

C

Global shape rotated 45°

Downward pointing triangle of diamonds

Which is more similar to A?

A

B

Whole rotated 45°

C

Global shape rotated 45°
